- O if it is pointer to array cforget it is pointer).

 breat it as array
- Dif it is pointer to array (foreget (it is pointer), breat it as array.
- (3) if it is pointer to array (forget it is pointer).
- (3) if it is pointer do away (forget it is pointer), breat it as arrays.
- (3) If it is pointer to array charget it is pointer), breat it as array
- (if it is pointer to array (forget it is pointer) frest it as array.
- (1) if it is pointer to array (forget it is pointer)
 treat it as array
- (B) If it is pointer to array (forget it is pointer)

 breat it as array
- (9) if it is pointer to among (forget it is pointer) treat it as array
- (13) If it is pointer to array (forget it is pointer) treat it as array.

- (1) if it is pointer to array (forget it is pointer) (reat it as array
- (12) if it is pointer to arrany cformet it is pointer)
 freat it as array
 - (B) if it is pointer to array (forget it is pointer)
 treat it as array.
- (4) if it is pointer to array (forget it is pointer) breat it as array.
- (3) if It is corrollater to array (forget it is points)
 breat it as array.
- (6) if it is pointer to amony (forget it is pointer)

 freat it as array
- (7) if It is pointer to array (forget it is pointer) breat it as array
- (8) If It is pointer to array (forset too it is pointer) breat is array
- (9) If it is pointer to array (Forget it is pointer)
 treat is as ormany
- (20) if it is pointer to arrow (forget it is pointer)
 freat it is as arrow
